

SOSAIAH HILLIER-BARNES

Bachelor of Information Technology — Computer Science

Brisbane, QLD | sosaiah.dev@outlook.com | sosaiah.netlify.app | 0421 323 311

SUMMARY

Computer Science graduate from QUT with hands-on experience building cloud-native and AI-powered web applications using React.js and AWS. Seeking a graduate software engineering or web development role. Open to remote work or positions in Brisbane and Melbourne.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, React.js

Cloud & Infrastructure: AWS (Cognito, KMS), microservices architecture, containerisation, load balancing, cloud-native infrastructure

APIs & Integrations: OpenAI (GPT), YouTube API, REST API integration, user authentication

Core CS: Algorithms & Complexity, Discrete Structures, Networks, Systems Programming, Databases

PROJECTS

YourTube

Scalable cloud-native video platform

Tech: React.js, AWS (Cognito, KMS), YouTube API, microservices

- Co-developed a cloud-native video platform with React.js and an AWS microservices architecture.
- Implemented secure user authentication with Amazon Cognito and encrypted resources using AWS KMS.
- Integrated the YouTube API for content discovery and built automated video upload and MP4 transcoding workflows.
- Architected for horizontal scalability through decoupled services, load balancing, and containerisation, with a scaling path toward 10,000+ concurrent users.

Credentials Cloud

AI-powered skills-mapping web application

Tech: React.js, OpenAI (GPT-5-nano)

- Co-developed an AI-powered web application that automates mapping of educational and professional content to the SFIA framework, giving organisations data-driven insights for hiring, workforce planning, training, and resource allocation.
- Led the initial UI implementation and integrated OpenAI GPT-5-nano functionality.
- Acted as primary liaison between the development team and the industry partner.

EDUCATION

Queensland University of Technology (QUT)

Bachelor of Information Technology, Major in Computer Science

Minor in Networks and Security

Relevant coursework: Software Development, Algorithms and Complexity, Discrete Structures, Networks, Systems Programming, Database Management

Brisbane, QLD

Graduated July 2026
